CAREER OBJECTIVE

As a highly motivated and skilled Frontend Web Developer, I bring expertise in crafting responsive, user-focused websites with modern frameworks like Next.js and Tailwind CSS. With a proven ability to transform Figma designs into pixel-perfect, functional web applications and hands-on experience managing dynamic content using Sanity CMS, I am eager to contribute to innovative development teams. I aspire to leverage my technical skills and creative approach to deliver impactful digital solutions while growing alongside a forward-thinking organization.

TECHNICAL SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, TypeScript
- **Frameworks:** Next.js (14)
- **Styling Tools:** Tailwind CSS, Figma-to-code conversions + Responsivness
- **Content Management:** Sanity CMS
- **Version Control:** Git, GitHub
- **Tools & Platforms:** VS Code, Postman. Lighthouse, BrowserStack

PROJECTS

Portfolio

- Developed a fully responsive personal portfolio website using Next.js and Tailwind CSS.
- Integrated interactive elements and animations for a better user experience.
- Showcased professional projects and skills with an optimized user interface for a seamless browsing experience.

Blog.in

- Developed a blogging platform with Next.js and Tailwind CSS, enabling dynamic content rendering and clean UI/UX.
- Focused on performance optimization and accessibility for content-heavy pages.
- Added comment section with the help of advanced React states.

Cyber

- Transformed Figma design into a pixel-perfect website using Next.js and Tailwind CSS.
- Ensured design accuracy and responsiveness across all screen sizes.
- Utilizes React state hook.

Resume Builder

- Created a resume builder web application using HTML, CSS, and TypeScript with a focus on simplicity and usability.
- Ensure responsiveness across all devices.

Vantela

- Developed an e-commerce website using Next.js and Tailwind CSS, featuring a modern, responsive design.
- Focused on intuitive navigation and product showcase to enhance user experience.
- Uses Context API to manage cart functionality.

Furnisphere

- Built a dynamic marketplace website with Next.js 15 and Tailwind CSS, emphasizing scalability and responsive design.
- Integrate API data into Sanity CMS to manage dynamic products data.
- Integrated advanced filtering and sorting features for improved product discovery.
- Uses Context API to manage cart functionality.
- Integrated Clerk for authentication and Stripe for secure payment flow.

EDUCATION

Academic Studies

1st year-Medical Student August 2024

Abdullah Govt College For Women, Karachi, Sindh

Professional Development Studies

From Governor House, 2023

- **Frontend Development Course**
 - Completed a comprehensive program in Next.js development with advanced concepts like context API, react hooks, Authentication and Sanity CMS for data management.
 - Focused on building responsive, dynamic, and content-rich web applications.
- **Ongoing Learning**
 - Advancing skills in Python with a focus on modern development practices, creating AI chatbots.
 - Aspiring to become an **Agentic AI Engineer**, exploring AI-driven technologies.
